In a race to the bottom...

NEPTUNE CLEANERS COME OUT ON TOP

For performance and profitability!

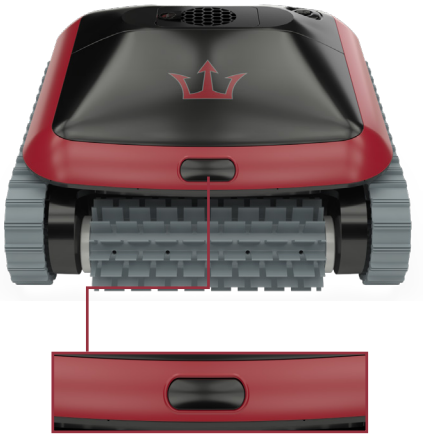
NEPTUNE

ROBOTIC POOL CLEANERS

The New Neptune Line Pool Cleaning Robot.

Gen Core 7 navigation system.
The robot moves smoothly and efficiently, giving you complete peace of mind.

Neptune i10



Planetary gear technology

Neptune i10 robots are equipped with two stage planetary gear technology, a drive system that offers greater efficiency and better precision; combined with two drive motors and a powerful pump, Neptune I10 is one of the most reliable robotic cleaners on the market.

This system is the ideal solution for fast, optimized travel, unmatched cleaning and unrivaled reliability.

Energy efficient

With their rapid and logical travel mode and powerful suction, **Neptune i10** robotic cleaners work fast. Cleaning cycles are short, consume less energy, and yield a flawless result.

Neptune i20 & i30

BWT Best Water App

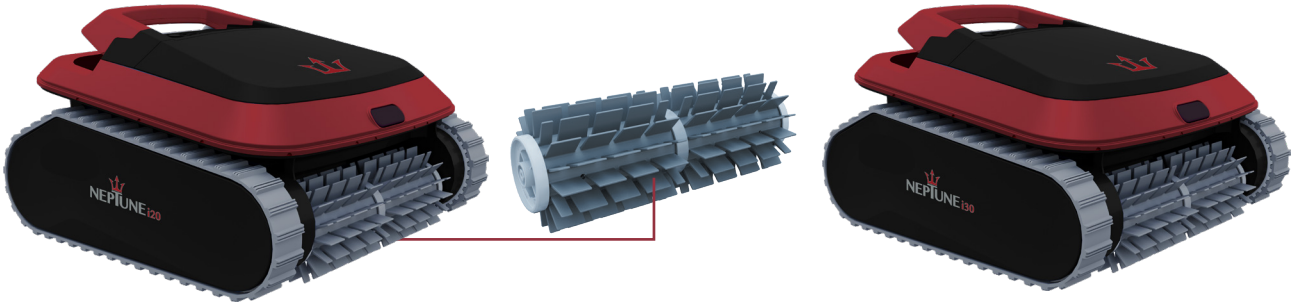
AVAILABLE ON Google Play



Concentrated technology with low energy consumption

The Neptune i20 & i30 pool cleaning robots cleans the bottom, walls and waterline of any pool up to 46 ft long for i20 and 60 ft long for i30.
Its smart navigation system and integrated gyroscope assure a sparkling clean swimming pool.

Powerful Suction

The Neptune i10, i20 and i30 pool cleaning robots are equipped with **advanced vacuum technology capable of vacuuming up to 4,000 GPH.**
It effortlessly lifts and captures pool debris.

User-Friendly Design

Weighing in at **only 12 lbs** and equipped with a **rapid water evacuation** system, the Neptune is super easy to put in and take out of your pool. Cleaning the filter is also a breeze: simply lift it out from the top of the robot and hose off.

Increased Agility = More Efficient Cleaning

Designed with remarkable agility, it can turn on a dime like a tank. This precise maneuverability avoids scattering debris, enabling the robot to effectively capture everything in its path!

Neptune i40

Our Most Powerful Suction

The Neptune i40 pool cleaning robot boasts superior suction power. Equipped with **our most advanced vacuum technology capable of vacuuming up to 5,300 GPH,** it effortlessly lifts and captures debris of all sizes.

Our Most Precise Filtration: HyperFine 4D

The advanced dual HyperFine 4D filtration system is designed to handle a wide range of debris. It captures particles ***as large as 180 microns***, such as leaves and sand, but also superfine contaminants ***as small as 1 micron.***

Removable filters make cleaning them a breeze!
Simply lift them out of the robot and rinse off.
